

Multiyear Training and Exercise Plan

NEBRASKA

PREFACE

State of Nebraska

The U.S. Department of Homeland Security (USDHS) Preparedness Directorate's Office of Grants and Training (G&T) requires that every State and Urban Area conduct a Multiyear Training and Exercise Plan Workshop (TEPW) annually. As a result, Nebraska recently conducted its 2011 Multiyear TEPW and has since produced this Multiyear Training and Exercise Plan (TEP).

The Nebraska Multiyear TEP is the roadmap for Nebraska to accomplish the priorities described in their Homeland Security Strategy. The State of Nebraska has pursued a coordinated homeland security strategy that combines enhanced planning, new equipment purchases, innovative training, and realistic exercises to strengthen Nebraska's emergency prevention and response capabilities. Training and exercises play a crucial role in this strategy, providing Nebraska with a means of attaining, practicing, validating, and improving new capabilities.

The State's training and exercise programs are administered by the Nebraska Emergency Management Agency, in coordination with the Nebraska State Patrol, and Nebraska State Fire Marshall's Office. The training and exercise agenda described in this plan is binding for all State-level response agencies, as well as any municipal response agencies receiving State homeland security funds. The plan helps prepare Nebraska to optimally address both the natural and technical hazards that it faces.

POINTS OF CONTACT (POCs)

State of Nebraska

Nebraska State Administrative Agent:

Name: Al Berndt
Office: Nebraska Emergency Management Agency
Title: Assistant Director
Address: 1300 Military Road
Lincoln, NE 68508
Phone: 402 471-7175

Nebraska Exercise and Training Point of Contact (POC):

Name: Aaron Alward
Office: Nebraska Emergency Management Agency
Title: Training and Exercise Manager
Address: 1300 Military Road
Lincoln, NE 68508
Phone: 402 471-7349

Multiyear Training and Exercise Schedule.....	5-7

PURPOSE

State of Nebraska

The purpose of the Multiyear Training and Exercise Plan (TEP) is to provide a follow-on companion document to the Nebraska Homeland Security Strategy. It is a living document that will be updated and refined annually. The Multiyear TEP provides a roadmap for Nebraska to follow in accomplishing the priorities described in the Homeland Security Strategy. Each priority is linked to a corresponding National Priority, and, if applicable, an Improvement Plan (IP) action. The priority is further linked to the associated target capabilities that would facilitate accomplishment of the priority and the training and exercises that will help the jurisdiction obtain those capabilities and achieve that priority.

Included in the Multiyear TEP is the training and exercise schedule, which provides graphic illustration of the proposed activities, scheduled for the years 2011, 2012, and 2013. It is representative of the natural progression of training and exercises that should take place in accordance with the building-block approach.

PROGRAM PRIORITIES

State of Nebraska

The state of Nebraska is divided into eight Planning Exercise and Training (PET) regions. Each region in the state conducted exercises throughout the year. Each region met and completed the Improvement Plan Analysis surveys in lieu of conducting a statewide Improvement Planning Workshop (IPW). The surveys were then sent to the training and exercise section at the Nebraska Emergency Management Agency (NEMA). NEMA Exercise & Training Officers (ETO) then reviewed the surveys and established the priorities for training and exercises needs based on the recurring common themes in the surveys. This information was presented on and confirmed at the annual Nebraska Training & Exercise Planning Workshop, which was conducted October 20-21, 2010.

1. **Communications:** With the continued growth of the statewide interoperable communications network, jurisdictions coming onto the system are in need of creating plans, training and eventually exercising those plans
 - a. This priority directly relates to the **Communications** target capability.
 - i. The state is currently offering numerous opportunities for jurisdictions to attend Paraclete training within their own county and regional jurisdictions, utilizing their own switch settings. This course will continue to be offered biannually after the initial trainings have been conducted throughout the state.
 - ii. Exercises are being planned that will test the parameters of the interoperability within the Paraclete system. These exercises will not be conducted until the stakeholders are trained and plans are in place for use.
2. **Incident Command System / NIMS:** ICS / NIMS continues to be an issue in day to day use. First Responders across the state have the training, but are slow to use Incident Command in day to day operations.
 - a. This priority directly relates to the **Onsite Incident Command** target capability.
 - i. Currently there are several courses available to support this priority to include IS 100, IS 200, IS 700, IS 701, IS 702, IS 703, IS 704, and IS 800. The IS course are independent study courses available on line at FEMA.gov.
 - ii. The ICS 300, 400 and 402 are continually taught several times a year throughout Nebraska.
 - iii. All PET regions plan for and exercise using the ICS/NIMS systems.
 - iv. G191 ICS EOC interface is currently being offered

3. **Emergency Operations Center Operations:** Jurisdictions throughout the state have recognized that there are a number of stakeholders that are not educated or exercised in the plans and mission of the Emergency Operations Center. There has also been a need to educate on the interface and communications between the ICS and the EOC.
- a. This Priority directly relates to the ***Emergency Operations Center Management*** target capability.
 - i. IS-775 Emergency Management and Operations is available on-line as an independent study course. EOC Management and Operations is currently being offered by state at a jurisdictions request and Basic Academy is updated and delivered twice a year for current and new emergency management professionals.
 - ii. G191 ICS EOC interface is currently being offered
4. **Planning:** Regional and County jurisdictions have adopted planning as a priority for upcoming years with respect to the number of plans that are in need of revision and creation. Interoperability Plans, County Local Emergency Operations Plans (LEOP) as well as COOP/COG Plans are a few plans that are being reviewed.
- a. This Priority directly relates to the ***Planning*** target capability.
 - i. The local stakeholders are currently working with the UNL Public Policy Center to create and revise plans.
 - ii. The state is working to bring in training for the new Net Planner program, designed to assist the locals in their planning processes.
 - iii. With the inception of the new interoperability program, Paraclete, new plans are being established and old plans are being revised continually to aid in the programs standardization and utilization.

METHODOLOGY AND EVENT TRACKING

State of Nebraska

In an attempt to meet the needs of the PET regions, the State of Nebraska has chosen to deliver training that will support the individual regional needs in preparation for exercise and actual response capabilities. The training that has been identified in this document is a direct result of regional input and the establishment of needs based on the After Action Reporting from exercises and actual events. The training that has been identified was deemed to be the priorities coming out of the PET regional surveys, as being the common needs across the state. The PET regions will continue to work on their individual improvement plans, utilizing the projected training and the HSEEP approach to move progressively to more challenging exercises in order to vet the skills instructed.

Region	Nebraska Multiyear Exercise Schedule: 2011
